- + Mother+child function for hassle-free weighing of toddlers

seca 874 dr

Flat scale with customizable label

Make a name with the seca 874 dr

Each name stands for a personality that is distinctive and different from all others. Those who are proud love to show their name. The seca 874 dr offers a customizable, embossed label for this purpose. This not only looks good, but also creates trust in the accuracy of the measured results.

Read twice as well

A double display has the decisive advantage that it can be read from both sides. The doctor can therefore quickly record the result, regardless of whether he is in front of or behind the patient. And the patient feels involved, because the scale also shows them their weight.

Setting up, tapping, weighing

Equipped with leveling feet and a level, the seca 874 dr can also be safely set up horizontally on uneven surfaces. One battery set is sufficient for thousands of weighings and makes the seca 874 dr together with a carrying handle and low weight well suited for mobile use. Tapping the foot pedal activates the scale, the other foot pedal operates the mother+child function, allowing a child to be weighed on the mother's arm.
